

Parapet Specials Division

EMTEK

Emtek offer specialist services for the supply of older generation systems to BS: 6779, full RTA repair/upgrade services and bespoke design work to assist client requirements.

All work is carried out to the highest international quality standard to ISO 9001: 2000 with all our manufacturing and installation teams working to best practise standards in accordance with the National Highway Sector Scheme Approvals 5A & 5B.

All steel sections are Hot Dip Galvanised to BS EN ISO 1461 and specialist paint systems are also available to meet aesthetic requirements.
