

CASE STUDY

LOCATION: Newtonards, Northern Ireland

Footpath repairs for leading power contractor

We were asked to support a leading power supply provider that required a first time permanent solution to its footpath repairs, particularly when its crews had to renew poles.

With a long standing track record in this area of high quality footpath repair materials, Emtek were able to provide a simple yet effective solution; 1) backfill with our high strength QC10F Concrete, 2) seal vertical edges with our SCJ bitumen spray, 3) apply our first time permanent cold lay

asphalt, 4) finish with our anti-skid overbanding tape. With all materials being BBA HAPAS approved, they provide additional 3rd party verification of their suitability, performance and longevity.

This allows works to be completed to a high

standard with no repeat visits to site.

Emtek are at the forefront of this market in Ireland and have experience working with national infrastructure organisations, utility, surfacing and highway maintenance companies.

Vision

It's our aim to provide each customer with quality products and services that are competitively priced, readily available and delivered with excellent levels of service.

We believe our customers should have a great experience when dealing with us and we commit to 5 key service offerings that help us fulfil our vision:

Dedicated Customer Support
On-site Demo
Products Ex-Stock
Prompt Delivery
Installation

Contact us today to see how we can best assist with your project.
