

## CASE STUDY

 **LOCATION:** Dungannon, Northern Ireland

# High strength ironwork mortars for leading Telecoms provider

**Our range of high strength ironwork reinstatement materials have been selected by a market leading telecoms provider to install and maintain their access chambers.**

Typically large scale ductile iron frames and covers that are in heavily trafficked carriageways, our mortars and on-going customer training package have proven a successful combination to the client and their contractors.

Speed of initial set, ease of workability and overall

strength are all key elements, along with the materials exceeding HA 104 guidelines.

Our full range includes bedding mortars, fibre reinforced high strength concrete's for backfilling reinstatements, along with a selection of cold applied asphalt solutions, bitumen

edge sealers and anti-skid overbanding products.

Emtek are at the forefront of this market in Ireland and have experience working with national infrastructure organisations, utility, surfacing and highway maintenance companies.

### Vision

It's our aim to provide each customer with quality products and services that are competitively priced, readily available and delivered with excellent levels of service.

We believe our customers should have a great experience when dealing with us and we commit to 5 key service offerings that help us fulfil our vision:

**Dedicated Customer Support**  
**On-site Demo**  
**Products Ex-Stock**  
**Prompt Delivery**  
**Installation**

**Contact us today to see how we can best assist with your project.**
