

CASE STUDY

 **LOCATION:** Westmeath, Ireland

Westmeath railway line given new lease of life

An abandoned railway line from Mullingar to Athlone has been given a new lease of life, being transformed into a section of the national cycleway network.

With 16 bridges to be protected, we came alongside the client to design and install 1400mm high safety railings that would blend into the historic setting.

Our BS: 7818 Class 3C compliant railings were galvanised and then painted

black, providing a smart and robust solution. The new cycleway will act as a catalyst to drive more leisure and tourism into the region.

Emtek were awarded the role of project co-ordinator and project supervisor on this scheme, giving the client a full service package.

Our team are experienced in running projects for our clients, across a diverse range of engineering disciplines.

Vision

It's our aim to provide each customer with quality products and services that are competitively priced, readily available and delivered with excellent levels of service.

We believe our customers should have a great experience when dealing with us and we commit to 5 key service offerings that help us fulfil our vision:

Dedicated Customer Support
On-site Demo
Products Ex-Stock
Prompt Delivery
Installation

Contact us today to see how we can best assist with your project.
