

CASE STUDY

LOCATION: Lisburn, Northern Ireland

Access control solution for busy manufacturing plant

A leading manufacturing company needed to safely control the flow of vehicles around its plant and asked Emtek to provide a robust access control solution.

Our team provided one of our Raised Arm Barriers that could be manually operated by authorised staff, enabling vehicular traffic to be safely controlled.

Available in aluminium and galvanised steel, our range is lightweight, strong and maintenance free.

As part of the scheme we also installed our Armco Safety Barriers as a cost effective method of closing off sections of the yard either side of the access point, providing a robust solution.

By working closely with the client we were able to complete the works with

minimal disruption to traffic and pedestrians working around the site.

Emtek have experience in supplying both manual and electrically operated Raised Arm Barriers within car parks, health, education, retail and industrial environments.

Vision

It's our aim to provide each customer with quality products and services that are competitively priced, readily available and delivered with excellent levels of service.

We believe our customers should have a great experience when dealing with us and we commit to 5 key service offerings that help us fulfil our vision:

- Dedicated Customer Support
- On-site Demo
- Products Ex-Stock
- Prompt Delivery
- Installation

Contact us today to see how we can best assist with your project.
