

# Project Delivery Team

Every year we work on hundreds of projects, ranging in scope, size, product requirement and locations throughout Ireland. As a specialist contractor we supply, deliver and install many of our products to client sites, working hard to provide a great service.

Increasingly we have clients who ask us to help develop bespoke solutions for their projects & to provide a broader undertaking of works. Our project delivery team leads & manages this process, working alongside our clients to provide site surveys, technical & structural consultancy, product design, fabrication, installation and full project management services.
