

CASE STUDY

LOCATION: Bathgate, Scotland

Industrial protection for Oil & Gas plant

As part of the construction process of a new state of the art manufacturing plant, Emtek were asked to provide barriers, bollards and wheel guides in and around the car parks and fabric of the building.

Designed to keep staff safe from moving vehicles and also to ensure doorways and cladding did not get damaged from multiple fork lift truck movements, we designed and installed a suite of robust products to meet the client brief and budget. All steel components were hot dip galvanised for durability with

an addition yellow painted finish applied to the railings and bollards to highlight them to site traffic.

The scale and scope of works was significant and we liaised closely with the project architect and main contractor to ensure products were manufactured and ready for installation as

particular sections of the scheme were being handed over.

Emtek have over 20 years' experience in this field, developing and implementing safety solutions for industrial, retail and commercial environments.

Vision

It's our aim to provide each customer with quality products and services that are competitively priced, readily available and delivered with excellent levels of service.

We believe our customers should have a great experience when dealing with us and we commit to 5 key service offerings that help us fulfil our vision:

- Dedicated Customer Support
- On-site Demo
- Products Ex-Stock
- Prompt Delivery
- Installation

Contact us today to see how we can best assist with your project.
