Leinster Carriageway repairs

Vision

It's our aim to provide each customer with quality products and services that are competitively priced, readily available and delivered with excellent levels of service.

We believe our customers should have a great experience when dealing with us and we commit to 5 key service offerings that help us fulfil our vision:

Dedicated Customer Support

On-site Demo
Products Ex-Stock
Prompt Delivery
Installation

One of Leinster's local authorities needed a high performance carriageway repair material that would allow for rapid trafficking.

Emtek were able to provide on-site training for their works crews and their engineers, highlighting the best use of our Ultracrete Instant Road Repair products. As a cold lay asphalt material it can be compacted and immediately opened to traffic, ideal for the highly trafficked carriageways in this and

many of the provinces counties.

Our rapid repair range includes other asphalt solutions, including our bitumen edge sealers and anti-skid overbanding products. Together these are providing a first time permanent solution to carriageway repairs.

Emtek are at the forefront of this market in Ireland and have experience working with national infrastructure organisations, utility, surfacing and highway maintenance companies.

Contact us today to see how we can best assist with your project.
