

CASE STUDY

 **LOCATION:** Craigavon, Northern Ireland

Rapid repair materials helping Irish gas company

When a leading utilities contractor needed high performance materials for reinstating carriageway ironwork, they selected Emtek Ultracrete.

With a long standing track record in this area of highway maintenance, Emtek were able to provide on-site training for the works crews and their engineers, highlighting the best use of the rapid repair materials.

Our range includes HA104 compliant bedding mortars, fibre reinforced high strength concrete's for backfilling reinstatements, along with a selection of cold applied asphalt solutions, bitumen edge sealers and anti-skid overbanding products.

Emtek are at the forefront of this market in Ireland and have experience working with national infrastructure organisations, utility, surfacing and highway maintenance companies.

Vision

It's our aim to provide each customer with quality products and services that are competitively priced, readily available and delivered with excellent levels of service.

We believe our customers should have a great experience when dealing with us and we commit to 5 key service offerings that help us fulfil our vision:

Dedicated Customer Support
On-site Demo
Products Ex-Stock
Prompt Delivery
Installation

Contact us today to see how we can best assist with your project.
